DURATION WINDOWS

Supplying high quality aluminium products since 1985

Durations Putty-Line Window

With their authentic 45° angled putty-line design our Putty-Line windows are the perfect solution for replacing old putty glazed steel windows. The window has been specially designed to replicate the appearance and slim sight-lines of traditional putty glazed windows, whilst offering superior security, weather and thermal performances. They use the latest 'Polyamide' thermal break barrier technology and double glazed gas filled sealed units to achieve excellent U-values.

These windows can be fitted into original or new timber frames or direct to brick. The

authentic design of these putty-line windows help to maintain the character of your period property; perfect for Art Deco properties.

Our putty-line window is also available with our innovative clip-on A-shaped astragal bars. The unique clip on system allows for ease of glazing and de-glazing on site - without damaging the bars, glass or window.

This window is suitable for new build as well as replacement or refurbishment projects, as well as listed buildings and conservation areas.

Features

- Slim sight-lines - outerframe outside-edge only 25mm (visible frame).
- An authentic look that replicates traditional putty glazed steel windows.
- Corners can be welded to further increase authenticity - upon request.
- Excellent U-Values due to its superior polyamide thermal break barrier.
- Modern multi-point Espag locking.
- Internally glazed sashes - 28mm double glazed sealed units. *
- Fit into new or existing timber frames, direct to brick or into stone surrounds.
- A fraction of the cost of new steel windows.
- Rust free and virtually maintenance free metal windows.
- Glazing options include our flat or clip-on A-shaped astragal bars.
- Fitter friendly clip-on A-shaped astragal bars make glazing and de-glazing far easier than any of its predecessors.
- Suitable for use in period properties, listed buildings, heritage and conservation areas.
- Exceeds all the specifications for new build.
- Perfect for replacement and refurbishment projects and is equally at home in domestic and commercial applications.
- Curved, arched and shaped windows can be fabricated.
- Available with Black, White or Grey Gaskets (White used on inside only)
