

Privacy Glass

When the possibilities for Ste'alth™ Privacy Glass are endless, why should this technology only be used in offices ?

This technology, although it has been around for many years in other countries, has only just started to become available here. Like any new product it takes time to trust that it will give many years of trouble-free service. To build that trust we have installed the glass in a very harsh environment....a boat. The boat has been trialled on the North Sea - a tough test we are sure you'll agree. (The boat also has Duration triple track aluminium patio doors installed, showing our products are tested to the extreme.)

From clear to

opaque in under a second

- ☑ Windows and doors are tested in a marine environment.
- ☑ Special designs for drainage.
- ☑ When privacy mode is activated, you can still read as room is still bright, no lights required.
- ☑ Reflects the sun to prevent heat buildup in the cabin.
- ☑ No curtains needed.
- ☑ Instant privacy at your fingertips.
- ☑ No other boat we know has this item.

Instant fingertip control
