

Integrated Blinds

Manual Or Electronic Blinds For Bi-Folding Doors

DURATION
WINDOWS

Single Rail Magnetic *Manual Blinds*

For Bi-Folding Doors

Our integrated Venetian style blinds fit neatly inside the double glazed sealed units which not only protects the blinds but keeps them dust and maintenance free. The slats are designed to not only raise and lower the full height of the door panels but they can be tilted so that you have maximum control over the amount of light entering your room.

Using these integrated blinds incorporated into the glazed units allows a room to have both privacy and protection from bright light without blocking all natural light or view. The blades effectively diffuse the light when tilted to different degrees - offering precise control.

Key Features

- Venetian style blinds with high quality aluminium slats.
- Ease of installation; already installed inside the sealed units.
- Easy to operate using a cleverly designed magnetic slider.
- Optimum control of light and heat in rooms.
- Slats are available in a range of 9 colours.
- Slider, top and guide rails available in 3 colours.
- Ensures total protection against dirt, dust or weather conditions and therefore do not require any maintenance.
- Designed with safety in mind and in accordance with blinds standard EN13120 for child safety.

Dual Rail Magnetic *Manual Blinds*

For Bi-Folding Doors

Integrated blinds are Venetian style blinds that are actually installed inside the double glazed sealed unit. Our integrated blinds are manufactured to the internal size of the sealed unit, fitting neatly between the two sheets of glass. The slat raising, lowering and tilting function is achieved using a magnetic transmission through the glass, thereby guaranteeing the unit's hermetic seal.

This integrated blind system is very simple and easy to use and functions with surprising grace and speed. Raise, lower and tilt functionality is achieved by simply sliding the push blocks along side border rails.

Key Features

- Venetian style blinds with high quality aluminium slats.
- Ease of installation; already installed inside the sealed units.
- Easy to operate using 2 magnetic sliders for up/down & tilt functions.
- Optimum control of light and heat in rooms.
- Slats are available in a large range of colours.
- Top and guide rails available in a large range of colours.
- Ensures total protection against dirt, dust or weather conditions and therefore do not require any maintenance.
- Designed with safety in mind.

Battery Controller **Electronic Blinds** For Bi-Folding Doors

Our integrated Venetian style blinds fit neatly inside the double glazed sealed units not only protecting the blinds but keeping them dust and maintenance free. The slats are designed to not only raise and lower the full height of the door panels but they can be tilted so that you have maximum control over the amount of light entering your room.

The electronic blinds are battery operated using the controller provided which means no costly electricians are needed to install the units. The controllers are re-chargeable using the charger provided and are designed to operate the blinds with raising, lowering, and tilting functions.

There are two options available with these blinds:

- Manual control - supplied with one controller which will operate one blind at a time. The controller must be moved from unit to unit to operate each blind separately.
- Remote control - supplied with a controller for each panel and a separate remote to operate the blind units individually or as a group.

Key Features

- Venetian style blinds with high quality aluminium slats.
- Ease of installation; already installed inside the sealed units.
- Easy to operate using stylish rechargeable battery powered control unit.
- Optimum control of light and heat in rooms.
- Slats are available in a range of 9 colours.
- Ensures total protection against dirt, dust or weather conditions and therefore do not require any maintenance.
- Designed with safety in mind with no cords.

Blind Operation

Raising - push 'up' button

Lowering - push 'down' button

Tilting - hold 'up' or down' button to rotate slats
